Education

Systems Technology Institute (STI)
2023 - Present 2024
Bachelor of Science in Computer Science

Marinduque Midwest College
2021 - 2023
Technical -Vocational-Livelihood (TVL)
Information and Communication Technology (ICT)

About Me

I am a dedicated and determined student of computer science who has an enthusiasm for data management and software development. I'm currently working for a bachelor's degree, but during my on-the-job training or working Immersion trainee, I managed important data using Microsoft Excel and honed my organizing skills. I'm good at solving problems and working in teams. I'm also proficient in algorithms, data structures, and Java programming. I am eager to use my expertise as a junior software developer to help the company succeed by adding to creative projects. I'm a significant asset to any team because of my adaptability and curiosity.

Work Experience

- **Marinduque Midwest College**

  Work Immersion Trainee
  Admission/School Department
  Duration: [2 months] (extended beyond the initial 80 hours)

- Initially assigned to work for 80 hours, but my tenure was extended at the request of the administrative team due to my performance and skills.
- Managed critical data for students and teachers using Microsoft Excel, including attendance and salary records.
- Handled tasks including attendance tracking and salary record maintenance.
- Demonstrated proficiency in data management and accuracy in handling sensitive information.
- Developed strong organizational and time management skills while meeting deadlines in a fast-paced environment.
